NOTICE OF APPLICATION TO APPROPRIATE WATER BY PERMIT

APPLICATION: 31324

DATE FILED: May 15, 2002

Notice is hereby given that Orland-Artois Water District (District) has filed an application for a water right permit for diversion of water from the Sacramento River, tributary to Suisun Bay in Tehama County. The State Water Resources Control Board (SWRCB) will determine whether a water right permit should be issued for the application and, if so, whether conditions are needed in the permit to protect the environment, the public interest, and downstream water users. This notice provides a description of the proposed project and also describes the procedure and time frame for submittal of protests against the application. This notice may be viewed at the Division of Water Rights' (Division) website at www.waterrights.ca.gov. Any correspondence directed to the applicant should be mailed to:

Orland-Artois Water District
c/o J. Mark Atlas
134 W. Sycamore Street
Willows, CA 95988

Description of Project

The applicant proposes to divert 400 cubic feet per second (cfs), not to exceed 30,000 acre-feet (af) per year, by direct diversion and proposes to collect 70,000 af to underground storage from October 1 to May 31. The total combined amount taken by direct diversion and storage during any one year will not exceed 80,000 af. The applicant proposes to divert water from the Sacramento River using the federally-owned facilities at the Red Bluff Diversion Dam and through the Tehama-Colusa Canal. The applicant plans to enter into an agreement with the Bureau of Reclamation to divert water at the Red Bluff facilities. Subsequent to Tehama-Colusa Canal, the water will be transported through the applicant's existing canals and laterals to the facilities and lands used to infiltrate the diverted water for underground storage. The spreading grounds are within the District service area. Recharge will occur through (1) constructed recharge basins; and (2) in conjunction with agricultural lands during non-irrigation periods. The water will be used for the irrigation and frost protection within the District service area.

"The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our Web-site at <http://www.swrcb.ca.gov>"

Summary of Application

County: The point of diversion is within the County of Tehama.
The place of use is within the County of Glenn.
Source: The Sacramento River, tributary to Suisun Bay.
Point of
Diversion: Located within the SE ¼ of NE ¼ of Section 33, T27N, R3W, MDB&M.
Amount: a. 400 cfs of direct diversion, not to exceed a total of 30,000 af per year.
b. 70,000 af per year of underground storage.
Not to exceed 80,000 af, total amount taken by direct diversion and storage.
Season: October 1 to May 31.
Purposes: Irrigation and Frost Protection.
Place of Use: 28,988 acres within the boundaries of Orland-Artois Water District service area.

Environmental Information

According to the California Environmental Quality Act (CEQA) and its guidelines, Orland-Artois Water District is the lead agency and will be responsible for preparation of appropriate environmental documents for the project and for determining whether or not the project will cause a significant effect on the environment. If you are not filing a protest, but wish to submit information that indicates the project may cause a significant effect on the environment, please send this information to the lead agency immediately with a copy to Steven Herrera; SWRCB, Division of Water Rights; P.O. Box 2000; Sacramento, CA 95812-2000. This information will be reviewed in accordance with CEQA.

PROTEST SUBMITTAL INFORMATION**Protest Requirements**

A person may file a protest based on any of the following factors:

- Interference with prior water rights.
- Adverse environmental impact.
- Not in the public interest.
- Contrary to law.
- Not within the jurisdiction of the SWRCB.

All protests must clearly describe the objections to approval of the application and the factual basis for those objections. There must be a clear link between the proposed project and the objection to its approval. If the objection is based on interference with prior water rights, the protest must describe specifically what injury would result if the application is approved. In addition, the party claiming interference with prior rights must provide specific information describing the basis of the prior right, the date the use began, the quantity of water used, the

purpose of use and the place of use. Please note that any water right permit issued by the SWRCB is subject to vested water rights and will include conditions to protect such rights.

If the protest is based on an allegation that the proposed appropriation would not be within the SWRCB's jurisdiction, would not best conserve the public interest or public trust uses, would have an adverse environmental impact, or would be contrary to law, the protest must be accompanied by a statement of facts supporting the allegation.

For example, public interest protests should clearly indicate how the appropriation will affect the public; environmental protests should identify specific impacts and provide supporting recitals on the effect of the proposed project on plants, animals, fish, erosion, pollution, aesthetics, etc.; public trust protests must identify the navigable waters and public trust values that would be affected by the proposed project and how the project will impact public trust values.

All protests should include a description of any measures that could be taken to resolve the protest. The protest also must indicate the manner in which the protestant served upon the applicant a duplicate copy of the protest.

If sufficient information is not submitted, the SWRCB may reject the protest or request that the protestant submit additional information. Protests of a general nature (not project specific) or protests that are inconsistent with constitutional or legislated state policy will not be accepted. A request for information or a request that studies be conducted does not constitute a protest.

Procedure for Submitting Protests

Protests should be submitted on standard protest forms available from the Division's website at www.waterrights.ca.gov/forms/ or upon request from the Division. A pamphlet that provides additional information relating to water rights and the procedure for filing protests is also available on the website or by mail. Any requests or the submittal of the completed protest form should be directed to the engineer listed as the contact person at the end of this notice. **A copy of the completed protest form must also be mailed to the applicant.**

Protest Submittal Deadline

Protests submitted in response to this notice must be received by the Division by 3:00 p.m. on the **60th** day after the date of this notice (the close of the protest period). Protests may be submitted by any of the following methods:

1. Mailed to Division of Water Rights, P. O. Box 2000, Sacramento, CA 95812-2000
 2. Faxed to the Division at (916) 341-5400
 3. E-mailed to the engineer listed below under the heading "Contact Person"
 4. Hand-delivered to the Division office located at 1001 "I" Street, 14th Floor, Sacramento, CA.
- If you choose to fax or e-mail the protest due to the constraints of the noticing period, the fax or

e-mail must be followed by timely delivery of an original signed copy, either personally or by mail, to the Division in order for the protest to be accepted. The SWRCB will respond to all protests within 60 days of the final day to file a protest. **Protests not submitted by the close of the protest period will be subject to rejection.**

For good cause, the SWRCB may grant an extension of time to file a protest. It is the protestant's responsibility to contact the engineer listed below as "Contact Person" to request the extension prior to the end of the protest period.

Resolution of Protests

The applicant will have 30 days to respond to a protest once it is accepted by the Division. The protestant and the applicant are expected to make a good faith effort to resolve the protest within 180 days from the close of the protest period.

This is a "major" project (the proposed diversion is greater than 3 cfs by direct diversion or greater than 200 af per year by storage) as defined by section 1348 of the Water Code. Therefore, any protest issues not resolved by the applicant or by provisions of section 1335 of the Water Code will be decided by the State Water Resources Control Board following an evidentiary hearing.

CONTACT PERSON

To obtain additional information regarding this project, or to obtain copies of protest forms, or general information pamphlets, please contact Yoko Mooring by phone at (916) 341-5362 or by electronic mail at ymooring@waterrights.swrcb.ca.gov. Information and protest forms are also available at the Division's website: www.waterrights.ca.gov/forms/.

Date of Notice: **May 9, 2003**
